

TECHFLEX
GOES TO
GREAT LENGTHS...

A COMPLETE LINE

Techflex offers a complete product line of braided sleeveings designed to offer maximum protection, design flexibility and return-on-investment for all your sleeving applications.

Various sizes are available to fit any diameter bundle up to 4 inches. All are lightweight, reusable and add to the longevity of the wires, wire harness or cables.

FLEXIBILITY

FLEXO expandable monofilament sleeveings are designed for bundling and protecting hoses, cables and wire harnesses from abrasion and damage in both routine and extreme conditions.

Flexo's unique mesh construction allows easy installation over new or existing cables or harnesses without adding to the bulk or weight of the bundle.

DURABILITY

There is a Techflex sleeving product to meet the specifications of your next application. Flexo products offer:

- Electrical protection for wires
- Chemical resistance
- Flame retardance
- Cost effectiveness
- UV light resistance
- Abrasion resistance
- Flexibility at high or low temperatures
- Durability
- Heat and moisture permeability
- Resilience

APPLICATIONS

Techflex products are available (from stock in many cases) for a wide range of applications:

- Electrical wires
- Electronic cables
- Control cables
- Cable harnesses
- Hydraulic hoses
- Pneumatic hoses
- Video cables
- Camera cables

Flexo PET is braided from a 10 mil monofilament yarn of polyethylene terephthalate. It is especially useful in passive applications where flexibility, durability and economy are important considerations.

Flexo HW offers the same basic characteristics as Flexo PET in a 15 mil yarn. 50% more material means extra abrasion resistance in applications where higher durability is necessary.

Flexo FR is braided from a 10 mil polyfibre-polyester yarn and is recommended for applications in which flame-resistance and durability are critical.

NEW Flexo WRAP is a braided monofilament sleeving with a Velcro™ closure for easy installation. It is available for use with a variety of Flexo products.

NEW Flexo NYLON is braided from a 12 mil strand of nylon 6/6. This new product offers an extremely high degree of abrasion resistance and thus optimum durability at a very attractive price.

Colors available: Red, blue, green, yellow, orange, grey, clear, neon red, neon green, neon pink.
