

The New FLEXO FLANGE

What will you do with yours??

Techflex's brand new Flexo Flange is a quick and effective way of creating permanent wiring installations attractively and affordably. Flexo Flange is used in a variety of applications where a secure, finished end is desirable. The processed ends add hundreds of pounds of strain relief.

This innovation opens a whole new world of management possibilities that are more flexible and END USER friendly than any previous conduit type.
