

# TUBULAR BRAIDED FLY TYING MATERIAL

FLYFLEX™ is the coolest, most effective, tying material that anyone has seen in years. Endless design variations are possible ranging from caddis larva flies to crabs and from minnows to squid. With FLYFLEX and your imagination the creative possibilities are endless. Pros have seen our material at the tying conclaves and now it's available to you directly from the manufacturer.

Use FLYFLEX with other tying supplies\* and you will easily design flies that attract World Record\*\* setting fish. In fresh or salt water, FLYFLEX tying material is tough, able to hold its shape and the braided texture imitates the appetizing look of scales that will even make a fish's mouth water!

Packaged in an elegantly embossed, eye catching box, FLYFLEX is sure to inspire any fly fishermen's creativity.

\* Other tying materials used include Carvilles™ Mono Tying Thread, Zap a Gap™, Loon Soft™ Body Epoxy, Berol Prisma™ Color Markers, Flex Body™ materials.

\*\* IGFA World Record set by Mr. Bill Pate with his 86 lbs. Atlantic Sallfish, using 1/4" Pink FLYFLEX tied in the Rich's FLYFLEX Squid Fly Pattern. For other IGFA World Record Fish caught with FLYFLEX tied flies, check out our soon to be released web site at [www.techflex.com](http://www.techflex.com)
